No suggestions.

All good

I think individual projects or CA 2 assessments should be given rather than group assignments because all members of the group do not contribute sometimes

WORST Admin support / Office support / Rude office members

Faculty should be more understanding and clear in communication. Should encourage in extra curricular activities...

Course can include more practical training

Add more practical and quantitative subjects in BBI

Scope for improvement

Give students choice in their interest for research. If they are not interested kindly provide different options as well.

More engaging methods can be used to teach a few subjects.

More relevant topics

Should Give More Examples While Teaching Accounting Concepts

The course was up-to-date with the current ongoing research topics in the field and the instructors provided a valuable learning experience.

No suggestions, our college is perfect.

Faculty very egoistic, do not understand students problems and starts to ignore students when they are in problem. Have been in this situation and the faculty behaved very rudely, which is highly unprofessional. Also i would like to say correction of papers is not done correctly, they want every student to fail i guess. No support from faculty, only shows attitude. Stops replying when students are in trouble and need help.

Excellent

None, it's a very open minded place to learn. Built me up to be a confident woman carrying this place forever in my heart.

Re-do the syllabus of Travel and Tourism Management

Teachers could have been more approachable (physically as well as via online platforms like emails, messages, or calls) since there are times when certain permissions are required on urgent basis.

Have been the Student Secretary of the Training and Placement Cell, I feel that for the Job requirements aspect, apart from the companies that the placement cell faculty and student team reaches out to and tries to onboard, college shd try and partner with more companies with the help of contacts through all its faculties and alumni's as cold emailing and reaching out to companies by the placement team only doesn't work to get new and bigger companies onboard

Everything is Perfect.

Can include more field visits for learning and understanding the views of other professionals of particular topiccan help build the long term view for a student to plan out future studies. Thank you 😊

Jai Hind College should start masters program for Biotechnology because once a student comes to Jai Hind College, the best facilities and faculty provided here makes it really difficult to adjust in different colleges for masters and this is not a suggestion but a request, as jaihindites will always love to be called only jaihindites!

As bvoc TTM is all related to travel so just one suggestion take out for some exploration

To study further abroad, specifically in European countries, they need 180 ECTS points, which should be satisfied by a 3 year course but is not here. Only suggestion

I think in CA 1 the evaluation should be done based on both written ,orals and viva voce and making SEE question paper a bit more difficult will improve stress management and will give a temperament of not knowing things and eventually giving more knowledge so it will increase confidence in the student but also will give an edge of learning more new and detailed things

The college experience at Jai Hind is so worth it!

work on the economics department

Please show answer sheets for SEE so that students can understand where exactly they are going wrong and what can they do to improve. Just displaying marks does not give any opportunity for improvement as mistakes can't be identified.

Improve use of field work or field trips with curriculum.

noo

The department should be more considerate of students facing genuine challenges

More extensive learning and growing opportunities

Need to connect each and every subject to our practical life and our surrounding environment.

With the changing world syllabus need to be updated time to time.

Mock interviews can be taken as a part of semester 4 CA 2 assessments. The interview questions can be tailored depending on the students' interest (industry/academia).

Some math-related subjects were irrelevant as nobody calculates manually in the real world. More Excel and technology could be used. Some subjects required rote learning in the final exam.

I like the faculty and I feel I had the best environment for my studies.

-

None, best university I've studied at

None to add

None. Jai Hind is the best. I realized it after I joined another college for my PG 🙄

Maybe having some practicals, would also help. However, the curriculum has been very helpful to me after which I have really excelled.

Can include some industrial visits

-

Curriculum could be more research oriented and academically focused on more quantitative aspects of Economics.

Curriculum can be changed, and some new topics can be added, providing internships and vocational trainings

No suggestions, all were good.

Jai hind was the best college i've been to i miss it:)

Best experience with best faculty

No suggestion just keep changing the curriculum as per industry trends as game development industry is growing at a large scale.

I will be honest, learning from YouTube was looking way easier than what faculty was teaching especially inorganic chemistry

Try to understand students condition - Wilson Rao sir

Industry relevant Syllabus, including real case study based learning methods according to the real life business, upto to date technologies with including cloud computing to build an end to

end Data Analytics, Data Engineering, Ds project inclusion of PowerBI and industry experts visiting faculties and providing 100% placement assistance at least for Sem 4 Internships.

N.A.

More skill-based workshops should be held.

Apart from the courses related to the subject, students should be allowed to opt for a course which doesn't belong to their domain, so as to get exposure to other disciplines as well.

Syllabus should give more emphasis on building live projects, more of practical cloud computing knowledge and should engage with students for placement opportunities.

I feel jai hind days were one of the best days of my life and I am glad I have joined this college when it comes to suggestions feel college has already given us everything

From my view point, I should suggest that some practical job skills should also be included in the subject matter that are not currently there. Also, with regards to majors in third year, there should be more new papers be included like Ecotrics. Apart from this, had great experience in the college and special and very thanks to the kind of teachers we got over all the years but especially eco majors. Special thanks to all the teachers 🙏

Overall Good

No thanks

Got a good support from my teaching faculty

—

It was a great time.

The faculty should improve in the communication area when it comes to students. Acknowledging the efforts of students, not being biased towards a set of them. Otherwise a very decent job done at teaching. Giving my honest feedback with all due respect.

Food in college canteen is not healthy or helpful to the students. I hope the junk food from the canteen reduces and healthy food is seen more as an option at better rates.

Junk food is given at affordable rates, good quantity but the quality is not good (seems color is added in food to make them look orange or red).

And healthy food is not given more at quantity and affordable rates & if any of it is given then, the food tastes bald.

More practical work or field work experience should be made to do by students from college faculty each year. Like - one day visits & participating into the work at the subj related work places.

JHC BMM rocksss!

There are some teachers who should come to class on time and give proper notes to students as well.

Very bad bathrooms. Sanity and hygiene lacking entirely in and around the college. Very sad to see.

I understand that the program is highly demanding and is skill oriented and students enrolled are making an academic and career choice in the field that require commitment and dedication, and the course is designed to provide as much valuable insight and skills in the limited time bandwidth, which is highly appreciative. On a lighter note of suggestion, attendance manadate can be relaxed if possible in future to encourage already academically performing students the opportunities to get involved in other creative or extra curricular persuits, perhaps on merit basis, for participating more in events that could be beneficials for their overall growth. In the end, not to forget that the seminars, events and fests organised by the department and faculty did provide the students the window to foster their talents and level up their performance benchmarks.

Wonderful place to be at, no suggestions

Nope, Thankyou!

Nan

Can provide more material for theoretical concepts

Best College.

None jai hind feels like home and always will

It would be good to have updates in curriculum about software and computer programs required for jobs

Please keep the SEE also practical based like CA 1 and CA 2 and please give more subject combination options like I wanted to take all accounts but instead of that I had no option to take all accounts and I was given theory as well along with accounts if it is B.Com in Accounts I feel there should be more of accounts and very less of theory like only 1 subject kind of which incorporates the important and relevant theory part needed for future.

The curriculum should be more extensive, and some focus on computer programming skills
