On a scale of 1 to 5, with 1 indicating minimal relevance and 5 signifying high effectiveness, how well did CA2 for Macroeconomics contribute to making theoretical concepts relatable and applicable in real-world scenarios during the course?

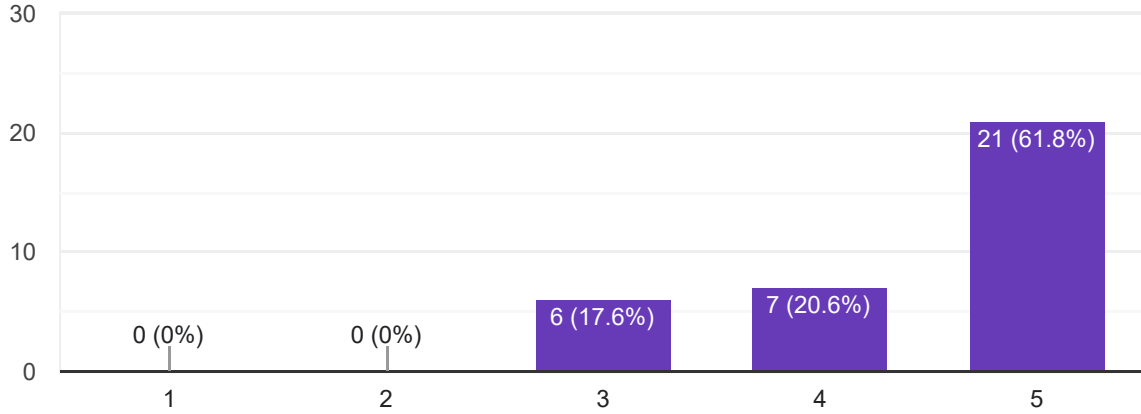

34 responses

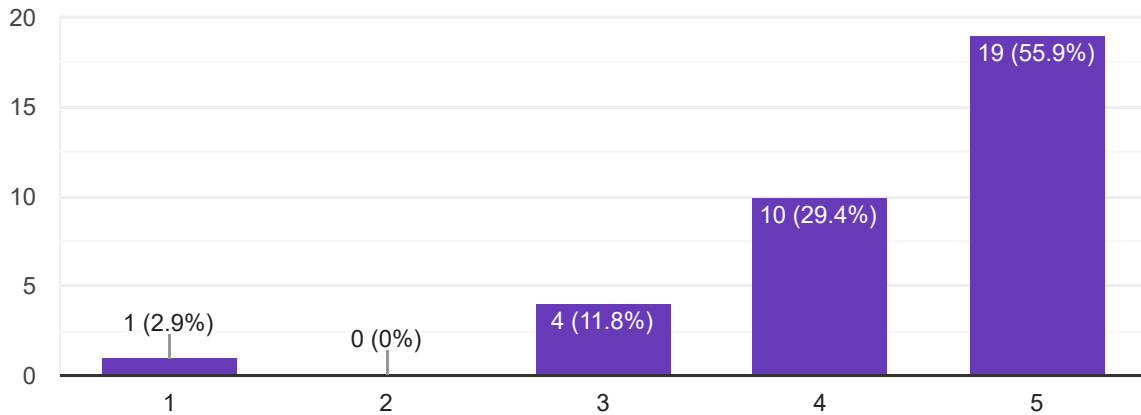

On a scale of 1 to 5, where 1 is least useful and 5 is highly beneficial, how would you rate the effectiveness of CA2 in enhancing your understanding of the concepts covered in the Macroeconomics class?

34 responses

On a scale of 1 to 5, where 1 signifies minimal interest and 5 denotes high levels of engagement, how captivating did you find this project?

34 responses

In what ways did the project contribute to your overall learning experience in the course? Were there any specific aspects of the project that you found particularly intriguing or thought-provoking?

34 responses

NA

Because of the article analysis i stepped into reading various real life scenarios and understand the concept better.

Analysing articles based on monetary and fiscal policy not only deepened my understanding of the course curriculum, but helped me understand how it could applied in real life projections and actually think about what could happen in the future. It has definitely made me more comfortable with understanding and discussing policies and their impacts on the economy.

I came across many newspaper articles for this assignment. I came to know about different economical concepts and theories due this assignment.

It was interesting to analyse concepts we have studied in class with real world situations

The article reviews have always been intersting and fun to work on. I for one could comprehend the topics we learn in class to particle use while writing my CA2

Application of macroeconomic concept in real life by review news article

it helped me understand the concepts of our syllabus well and connect to the notes. it gave me real life examples to the syllabus which helped well

It helped analyze real word situations with practically applying the theories that were taught in class, helped in gaining maximum knowledge

While doing this I learnt alot. It was really very interesting and thought provoking.

The project helped us to analyse various perspectives of theoretical concepts in practical life which makes it easier to understand.

Reading op eds for a better understanding

The research that i undertook to supplement the article's information lead to a a trail of articles that i followed and gained deeper insight into the post-demonetization indian economy.

It helped me develop my researching skills and how I could relate my studies with current affairs

I always appreciate how projects like this allow us to be creative with our application of theories!

I helped me see beyond the limitations of our syllabus, got to know about various terminologies that never came across earlier, got to know something new.

It helped me in enhancing my research skills, and summarise and understand the content in a solid way. It also made me more aware about the topic which was chosen by the students. I took Repo Rate to be my topic and i got know so much more about it which i should i have known before the project.

This CA2 benefited me a lot as it helped me visualise theoretical concepts as practical explanations and solutions for phenomenons in the economy. This project helped me string many multiple theories together into one cohesive image and gave me a better understanding of the workings of inflation and how do government measures affect it.

This project forced made me to view the scenario from perspectives that I usually would stray away from. I focused on inflation a lot in my analysis and now I feel like I understand it better. Overall it was a tough but rewarding experience.

It made me go beyond the textbook learning to apply it whilst writing the article analysis.

We could apply the theory based graphs and concepts in the prevailing economic situations of the world. So the project was indeed interesting.

Got to know the application of the concepts of IS and LM

It's helps me to improve learning, motivation and communication skills.

This was by far the most challenging Economics CA2 since we had to analyse and predict the real life implications of the IS-LM model. At the same time, it was quite interesting to apply our knowledge and relate govt policies to what we study in class. The project enabled me to not only understand the macroeconomic implications of policies and assess how they contribute to growth, but also simplify these concepts for my understanding. Hence, overall, it was a great learning experience and I truly enjoyed the research and writing process.

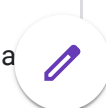

It made it easier for me to understand the inflation topic better

I usually do not believe graphs as a very effective tool for conveying practical concepts in economics. But this semester, using the IS-LM model to analyse real world situations give me a lot of insight into the process of economic analysis.

real life application of concepts, expanded knowledge about current events

Goodpractical learning, creative way of analysis , good exposure to the news

The integration of the current concepts in the article review helps sharpen the concepts in real world

I chose the topic fiscal framework. I got to know so much related to the topic. Overall it was a nice experience and reading articles is always a good idea.

It helped me to understand the macroeconomic perspective of the economy on topics like inflation recession etc.

DID THE CAII HELP YOU IN CLEARING YOUR CONCEPTS AND AID IN YOUR REVISION PROCESS? IF YES, SAY HOW.

31 responses

Yes, it gave some kind of idea abt different questions that could be asked in a mcq format

It was only a little helpful

Yes. I found it helpful to think of questions to ask and answer the questions my peers set for me. It was helpful with my revision and helped me gain clarity on the topics taught

I think it was a good way and maybe the only way the CA2 could have been conducted. It was interesting. wished it was conducted earlier.

Yes they did. While making questions for fellow members it was tricky and fun since we had to be sure of the answers while also making the paper tough enough. It did help in revising the concepts.

Had to go through the syllabus and make questions. So yes up to a point it did.

Yes, it was very informative.

Yes, participating in a group and making questions showed me where I stand with respect to my Peers in terms of my know-how.

Yes, the ca2 activity was spontaneous and interactive, which helped in revising the units with a different approach.

Yes, it helped clear basic concepts since we had to frame questions pertaining to basic concepts in tricky ways.

creating the question paper with my designated team made me recollect all the concepts learnt in class and frame it creatively. We received our question paper on LPP and integration which helped us revise the topic and gave us an insight into the kind of questions that can come in sem end exams.

was very nervous to do the CA2 initially but it ended up being a fun exercise.

Yes

yes, it helped me research and also work with my pees to clear my doubts on topics

I definitely did

Yes, innovative concept of group learning

yeah because making questions for things we usually answer made me think in a different way,

and i feel pretty confident about the topics which was given to our group

Yes. Understood the concepts clearly

Yes, while making and answering questions got to see what potential theoretical questions can come.

Yes it did, helped me understand applications on the concepts in detail since we had to give questions to others

Yes, It gave us the practical knowledge about the concept even better

Yes, while making and solving the questions we got an idea of how 1 mark questions could be asked. By preparing the questions from one particular topic, we could be sure if we know the entire topic/concepts in depth or not.

yes, CA2 helped in the revision process and it also made us think about different questions that can come in the exam

Yes , it made our concepts stronger

-

Yes,I believe that creating and answering questions from different units has helped me get a better understanding of the concepts.

Yes the CA2 did help aid my revision process as we had to make questions for a given topic and solve sums on a different topic. This helped in mentally revising the concepts so as to come up with questions of varied types and later solve questions so this indirectly helped me revise 2 units.

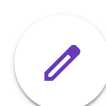

Yes, it helped me clear out the concepts & facilitated time bound practice in the form of tests.

Yes all of us could discuss and exchange notes and could put up questions on thing written in our notes also answering questions made us realise how much we know about the topic.

Yes, for the CAII we had to come up with questions ourselves which made us go through questions of varying difficulties and in the process of making and solving both, we got through two topics which was helpful.

Yes it cleared my concepts

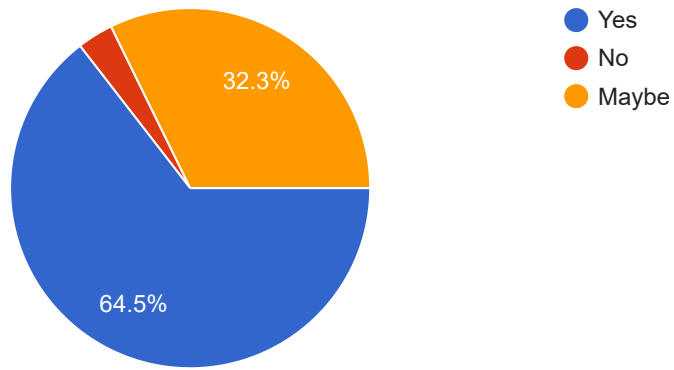

Yes,absolutely helped got to know the practical implications of the concepts studied in class.

DO YOU FEEL EXAM READY WITH THE CLASSES CONDUCTED?

ANY SUGGESTIONS REGARDING PACE OR METHOD OF TEACHING?

31 responses

None

Everything is fine

The last unit seemed a little rushed. If needed and possible, extra lectures can be arranged.

The classes were really interactive and the material was taught at a good pace and covered really well. The 5 minutes of revision at the start of class was really helpful

nope

Going a bit slower during the start of the topic would be helpful as in solving more sums in basics of differentiation and integration together specific for each rule initially.

A bit slower pace for concepts to be absorbed.

No suggestions, just thanking you for being according to everyone's pace. Not every Teacher is like you ;)

Thanks ✨.

N/a

The current method and pace is quite satisfactory, no changes are needed.

Na

- revising what we learnt in previous lec before starting each class has been really helpful.
- please continue recording the lecs if possible (at least the important ones)
- instead of getting practice assignments on classroom, we could maybe do something like we did in CA2.

No not at all

no.

Class recording archives (subject wise)

not really ;)

It was good

Pace and method to me is understandable and comfortable! 😊 😊

No, the entire semester went very well and everything was clear.

More sums

Very much comfortable with the pace and method of teaching. Would suggest to continue with the recording of lectures as it helps a lot!

no suggestions

Keep recording lectures, they are really helpful , even though I attend all lectures I find that the class is rushed at times and recording help me solve sums at my own pace

Good pace! Doubts always get cleared as others have the same ones as me

No suggestions as such, being a non math student after 10th grade it was honestly difficult for me to catch up with the subject and so many new concepts and topics suddenly but Ma'am has always tried to help us. Given the above reasons, I did find it a bit hard to keep up with the pace but otherwise the rest of the things were good. Thank you

If we can have some extra lectures so that the last module isn't so rushed. CA1,2 and lectures all happening at the same time unlike the offline setting, it's difficult to juggle sometimes.

Not really, it's on point!

All the lectures were well planned and taught in an easy to understand way.

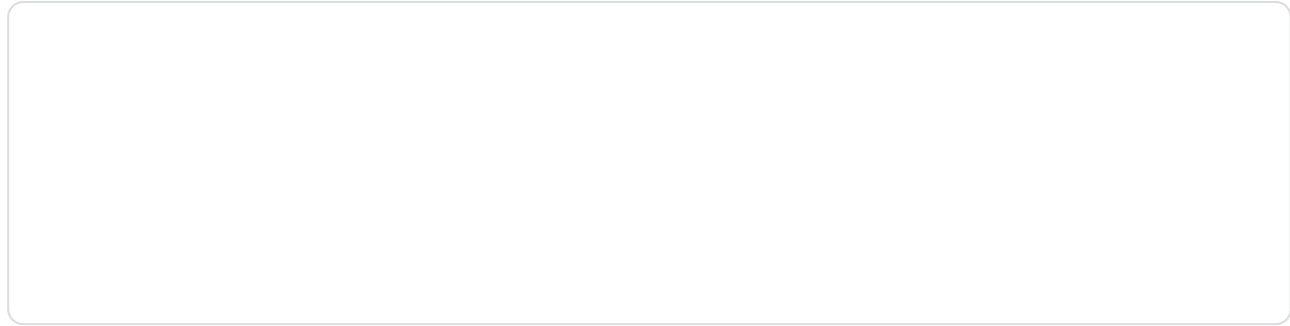

Pace is okay, sometimes a lil fast

What are your future career goals?

23 responses

My goals is to establish a career in the healthcare and hospital sector as a CEO or to lead a management team.

Masters in Biotechnology

I want to be a teacher / professor

Teachings or food dietician

MSC

Enter the field of Public Health as of now

Businessman

Into biotechnological field

Right now, not sure.

I am going to pursue Masters in Biotechnology and wish to take up a job in the industry.

Hospital administration

To be self sufficient and to start something of my own.

To do something in medical industry.

Researcher

Organisational psychology and research in trauma cases in a work place

Research and working in Health care.

Masters in Environmental sustainability or Masters in Nutrition and Dietics

To become a professor and gaining PhD degree along

Researcj

I am looking forward to work in the healthcare sector as it is one of the booming fields in India

Complete Masters degree, get selected for placements and start working independently

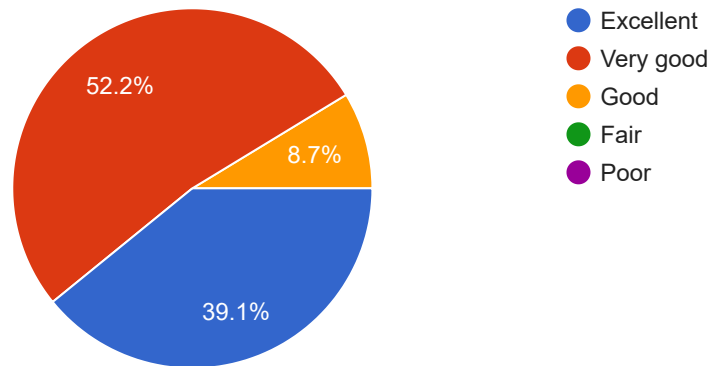

I am planning to pursue masters in bioinformatics.

Im hoing to switch to management

Teachers taught me English. They helped me by correcting my mistakes in grammar

Best teachers. Help me in study as well as in personality development. Always there to support us.

Briefly describe the mentoring/help that you received from your Life Sciences Teacher/Teachers mentor.

61 responses

Ms. Zeenia Avari has been extremely patient, helpful and supportive throughout classes and throughout the research project as a mentor. She finds interesting ways to teach and poses questions very effortlessly which helped me find the solution myself but with her help. She provided all the important information beforehand and gave us reasonable flexibility to work. She points out mistakes very politely and in a way that encourages one to improve them. She is great at teaching in a fun way and tries to maintain good connections with each student on a personal level. She remembers all details and makes sure to appreciate the good work and constructively criticise mistakes.

Our doubts were always cleared. We had fun while learning the teachers made our concepts clear. To be honest I never understood science but the way Niloufer ma'am explained for the first time in 4 years I understood the topics. I don't think I will get life sciences because of my kts but if get chemistry also I would love to have teachers like these.

Doubt solving

Certain topics were cleared on a personal level

About carrier option

Our teachers not only gave us amazing explanation of the topics in the syllabus but they have also maintained an incredible equation with all the students.

Teachers are just not bound with academic doubts they helps us with our difficulties of subjects and also go beyond academic. They also help us enhance our personal skills too.

Due to my low grades, the teacher supported me alot and gave me the right direction towards my career. Calling an alumini and keeping a session with them inspired me alot

They helped during the presentation wherever I went wrong
Helped me in many ways
Helped me in gaining confidence while speaking in front of the crowd

Teachers always answered our doubts.

They was always a very comfortable space between the teachers and me. They always helped me whether it be personal or academics. Encouraging me to be self confident and my all doubts were cleared. Helping me in understand a little complex concept was made easy by the teachers. The teachers were interactive with everyone so I in my opinion never felt left out in the class.

They helped with my internship process and also cleared my doubts about a particular subject or so.

Teachers helped with difficult topics

Timely provided valuable constructive feedback on overall development be it related to academics or personal growth, or better coping with other things as well.

Boosted my self confidence, helped in developing communication skills

The teachers were easy to contact and gave suggestions and solutions to most of problem. They also helped somewhat in my stage fear, my personality.

Makes us understanding the concept, help to fund appropriate route of career , give motivation and help to get correct route of success

the teachers are very helpful in clearing doubts and makes us to think outside of the box

For research, niloufer ma'am helped me a lot

My teachers helped me to push myself to achieve things when I thought I could not.

Ma'am help me to build my confidence. Ma'am always in courage.

In projects and research work.

Helped me in the subjects

Gave me career guidance

Taught us how to face difficulties in the subject

There were difficult times and my mental health was taking a toll on me. The teachers helped me out a lot. In terms of research, Sakina ma'am really motivated me. Guidance was given by Srilatha and Zeenia ma'am. Niloufer ma'am also helped me out a lot in terms of direction of thinking. The non teaching staff also taught me a lot of things. In every aspect they have helped me out

Gave the presentation about the different fields and explain about and personally also .

The teachers taught all the topics in depth and with great visual tools which helped us learn better.

All the Life Sciences Teacher's mentor us in personal growth by fostering positive values, attitudes, and behaviors.

The teachers helped with my research skills and I've improved a lot.

For research, the teachers gave valid suggestions, always motivated and helped me.

Teacher helped with a difficult subject and research

The mentoring provided by teachers/non-teaching staff is very helpful to me to achieve my goals in academics.

Ma'am did Helped with the topics that I have chosen to present in the during CAs.

In every thing life sciences teachers has helped me from study to build by personality. They were and they are always there to help whenever I need someone to guide me.

The teachers were very supportive and understanding. With respect to any aspect of yhe degree i received great help and guidance even if i asked the same questions repeatedly the teachers replied patiently.

We're always there to give a much needed push of encouragement

Help during research projects along with supporting during times that I found difficult to deal with.

All the teachers of the department helped me whenever I needed, In the last sem of degree during my research project Zeenia ma'am mentored me and she used to assess everything I did during my research project on almost daily basis and mentored me to finish up the project. She is the best research project mentor one could get. All the teachers of life science are the best at helping and mentoring their students so that they can do the best and reach heights.

The mentoring of teachers was really very helpful especially during research projects.

While sometimes getting on our nerves by not giving us the answer right away the teachers used to help us fig deep within ourselves and our capability of finding answers to our own question which made our thinking a bit deep and helped us to understand the answer to our query more easily and with different perspectives rather than just one

Always had a comfortable environment while discussing anything with the teachers.

Received help with respect to research and comepetition

Teachers supported me emotionally and also helped me with difficult subjects.

Always guided me through the difficulties

Solving of career related doubt no matter how many times asked .

they help us in knowing what scope we'll have after life science and internships and many other doubts

Zeenia ma'am always had a discussion over various topics regarding the portion she was teaching. Always open to any and all answers when provided in a logical and factual manner. Shes also very funny.

I was having problem with the combination of subjects to choose in second year as I was really confused with the career I wanted to opt but I had a brief discussion with life science department teachers Ms. Sakina G and Ms. Niloufer K. They really took out their time and explained me with the career options that you can opt for. It was quite helpful and gave me a broad spectrum of career options available.

Teachers were always their whenever I needed help

Doubts were solved nicely.

I have received a lot of help with respect to the regular college activities and extra career guidance as well

Everytime i had a question they were answered patiently and in a way that i could properly understand the concept

Provided insight on the avenues and career options for the future which I can look into as possible choices.

Encouraged in taking part in activities which helped me broaden my horizon.

They always there for help and guidance if problem is personal then they give there best to

solve the problem

Excellent knowledge and teaching

Though I left the college but Life sciences teachers are real gem if ever I get chance I would like to be their student in future their teachings and disciplined attitude along with

They are great at clearing doubts if any, whether it is related to syllabus or any projects.

They are always open for communication which makes it easy for the students to seek mentoring

Emotional help during crucial time and academic help to understand concepts easily

Whenever you have any silly doubt too you can feel are free to ask them they will never judge you.

The LS teachers did not just taught the subject but also the LIFE. Their intention has always been on making students punctual and disciplined which helped me in many other ways other than being on time for lecture.

During projects assignments some teachers explained things and understood our situation but some didn't

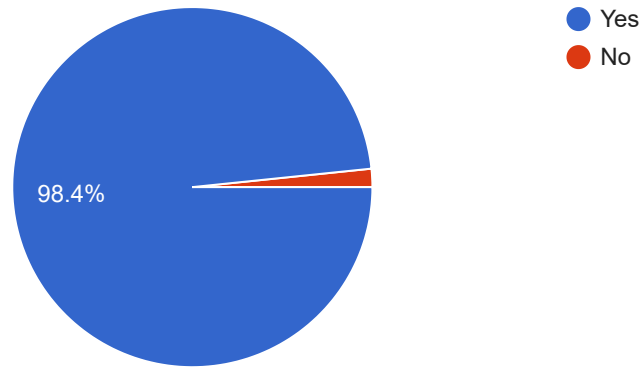

Teachers were there for us in case we had any doubts regarding anything regarding the subject. They encouraged us in every and any manner possible.

Did the Life Sciences Dept. encourage Peer Teaching/ Peer Learning / Peer Mentoring / Peer Evaluation?

 Copy

61 responses

Briefly describe the mentoring/help that you received from your Peers (Classmates of Life Sciences Dept.).

61 responses

Peer evaluation is a great way to develop and enhance personal skills and communication skills. It taught me how to look presentable and also helped develop some skills and the ability to answer spontaneous questions. It was also very important to help with reading information about a topic from authorised sources and using our innovative mind to make it better and catchy.

Life sciences department is always like a family always helping each other and our parents were Niloufer Ma'am, sakina Ma'am, zeenia ma'am and srilatha ma'am 😊.

Solving the difficulty in certain project topics

Explain the hard topic

Doubts or queries if any has always been cleared out by our classmates and everyone maintains a great equation with each other .

My peers are very helpful with everything. As we are in the same boat we understand each other very well and they help me with my doubts and encourage me towards my betterment.

Exactly the way I should study, motivation during the times i was low and under confident about my work.

Helped me wherever I loose my confidence
They helped me everytime when ever I need them

Help with assignments and completing the syllabus.

My classmates has been a great support throughout the year. They were a good competitor to me and even though sometimes i scored less from them but they always helped me without judging me and I have helped them when they needed me.

They gave us clarity with respect to our assignments and projects that helped me a lot.

Peers helped me with difficult topics

My peers helped me to challenge myself to move beyond the things that are most comfortable. It provides an avenue for self-reflection and problem solving ability in a more mannered way.

Boosted self confidence

To be very honest, the environment in the classmate was very toxic. People were too mean for unnecessary reasons. And they didn't even help that much. I'm just glad I got some friends. It was like the class was not a whole , way too much partiality and groupism.

Understanding concept at last moment, providing notes and all

they helped in clearing any concept of i was not present in the respected class due to some consequences

For practical and CAs

Support and help during times of absence to cover up on work. Emotional support.

Classmates helps me whenever I have difficulty in any topic or whenever I have doubt .

Helpunf to understand difficult problems.

In teaching us a few topics and clearing the doubts

In learning a concept and topic, peers have helped me out

We all helped each other with topics that were difficult for others and explain them using tricks or ways to memorize easier.

Providing Corrective Feedback, Identifying Goals

We did presentations which helped to increase our confidence

Emotional support and Help in completing assignments, practicals in general surviving each day.

Peer evaluation is the best thing in the lifesciences department. It helped me a lot to overcome my fear and be a confident person.

My classmates used to explain me few topics which were difficult for me with their point of understanding.

In studies sometimes

In general, sessions were arranged where the peers had to teach a few topics to the class. Apart from this in general too there were discussion based peer learning in class or if I had a certain doubt with a certain topic.

Understanding of certain concepts

Few of them were helpful getting through. Guided and supported whenever needed.

My classmates would always help me with understand some topics I don't understand in the first go, moreover if I would miss on anything because of my leave or missing on a lecture they would briefly explain me and made me understand it before the next class.

-

With peers discussion of assignments and worksheets used to help us to understand relevant info and apply it to our own project or assignment

Helpful and friendly.

Opinions

Peer learning made the lectures more interactive and also they helped understand difficult topics.

Supported each other gave suggestions about the improvement and even helped to get out of the comfort zone

they all help eachother in providing important information about lectures and practicals

None.

The classmates of life science were quite helpful to provide with the notes and explain the topics when it was not understandable by me. This helped me a lot.

Regarding topics I wanted to discuss about

Studied together during exams.

We were given an idea as to how to go about worksheets, CA2 projects, and the overall study pattern

Discussing doubts or queries amongst each other use to help a lot

They helped in understanding and figuring out topics.

Motivated me in trying out new challenges.

They always there to help us nd make us feel like own brother sister and always guide us in right way

Excellent teaching

Peers were helpful in all terms and it made me believe in the importance of fair competition in terms of academic

Not peers, but some of the seniors helped me a lot. They were always there to clarify doubts regarding projects and assignments.

Tricks on hiw to perform practicals

Important notifications related to exams and activities.

Unity

In LS dept all students are good at different topics some has good biochemistry where as some are good in physio....there was a good coordination amongst us...we all were actively helping eachother in the topics we fall weak in....

During assignments projects exams i got notes from my classmates
I joined college v late but they helped me out with everything

Coming into the degree college meant dealing with different people with different mindsets and different knowledge about various things. They helped by expanding their knowledge and sharing it with me.

What was the improvement you made on the basis of the mentoring from Teacher/s of Life Sciences Dept. Describe in 2-3 lines.

61 responses

-

Improved ability to respond to questions.

Respect towards Non teaching staff

Patience when working on a project

Always taking information from credible sources and verifying it

Always presenting information that you understand and not fancy words which you yourself can't justify or explain.

I never really liked science but after studying life sciences I started liking the subject maybe because of the teachers the way they teach nobody else teaches like this department does I started understanding topics.

Concepts were cleared

Interest was increased

Find easy during the exam

My confidence while presenting any presentation has improved .. I have received many ideas of making my presentation more creative and conceptual by our professors .. Not mugging up but actually understanding the concepts has become one of the most important things I have learnt in Lsc department .

Probably choosing the right subject for me without being biased on the basis of departments.

In my academics, I had recieved alot many kts and I was collecting them due to my physical and mental health issues. Then I was suggested to consult a counselor and then the tables turned. I started getting better in my academics though slowly but I did.

Understanding is important doing 'ratta' will never help
Improved in practical in many ways
Understanding the different types of questions

I was able to complete assignments on time. I had no issues studying for the SEE.

It build a self confidence in me and it thought me how to be more hardworking towards any subject with respect to Life -Science.

It gave me more clarity with respect to the subject and what stream to pursue my masters in .
All the topics were taught in great detail and guidance sessions were also kept by the teachers that cleared a lot of our doubts.

I was able to secure good marks in examinations.

I'm self focused and it helped me to learn and enhance my skills required such as leadership, team working, communication and problem-solving skills and planning and organisational skills.

Made me a little bit ambivert. Helped me in raising my opinion/thoughts. Encouraged my self confidence helped in communicating

As I said they helped me shape my personality. Sakina ma'am was always there to boost my confidence and someone I can talk to openly without any fear. Niloufer ma'am has taught me a lot , she's so inspirational and hardworking. Srilata ma'am is literally an angel. Zeenia ma'am helped me to communicate better in general and be open and discuss in class.

Brain functioning in multi direction

due to the mentors i have knowledge not just about the syllabus and the academics but certain new things also they have encouraged to speak up about our doubts on front of the whole class which has given certain amount of confidence also aced a little in grades from previous semester

Gained confidence

Doing things in an organised manner. Breaking down large tasks into small parts to do them more efficiently.

I build my confidence.

Being more confident, decision making ability and being punctual.

I focused more on studies
Helped me to get good grades

It gave me strength to move forward and I was able to produce the results that I was aiming for.

Whatever you are doing do with proper research and knowledge and not for just marks.

I gained a lot of confidence in myself and inculcated the habit of being punctual.

I'm the type of person who is under confident , And they help me to reach out from that.

Research skills, presentation skills and I've gained a lot of confidence to stand on my own now.

Punctuality and mutu tasking improved.

Lectures on self awareness

Overcome my fear to being a confident person.

I could make the topic easy for myself by listening their easy words which helped me explain my answers a bit easily during exams.

My PPT making and speaking skills has improved from before. A lot of encouragement. Made me confident and strong.

My basic laboratory skills improved greatly. Even the way I viewed and understood things changed greatly.

Gained more confidence in lab skills and other skills overall

Learnt how to deal with pressure and improved my grades too. Became less anxious in life.

Nilofer ma'am helped me in improving my confidence level, she always used to make me speak confidently, she is the best teacher one could get. And I am grateful and blessed.

The quality of my understanding of topics, the level of my assignments up to a professional level was greatly improved

Helped in personal and academic performance

Formulated better ideas

They really pushed me hard because of which I was able to get out of my comfort zone go in front of people and talk also encouraged us to participate in different extracurricular activities

I hated biology up until 12th std. LSC made me like it. I really wished I could opt for p-lsc for sy. Unfortunately which isn't an option.

I started being more punctual and perfect about each and everything

Made me research more on stuff I didn't know.

Academics was achieved by me but discipline was something that I lacked and the life science department teachers helped me to achieve both hand in hand. They used to keep on telling me

that if you can do both then only you can achieve great in your life ahead.

I improved on the way i do my projects and my method of learning

Passed the exams precisely because of the CAs. The questions were amazingly framed which helped in the SEEs.

I have been able to explore quite a lot and manage the overall schedule effectively.

I became more conscious as well as confident to what I say, write or to a extent explain
I learnt how to be consistent with my work

I have managed to balance out my work and fun time in college.
I find myself curious and learning new skills and principles.

Overall everything is gud but lit bit improvement in clearing doubts sometimes students didn't get there proper answer

Excellent grasping and knowledge improvement

Life Sciences department is one of the best department of the Jai hind college it made me realise the importance of discipline and punctuality.

Understood very well how to write an article from a website on any topics and the necessary steps to write it.

Hardwork and dedicated mindset.

I was able clear my basic concepts and was able to solve questions .

Calming down and do thing rather than skipping them

I learned how 1 min can cause someone to not be able to make 75% in pract and thus leading them to get KT in that pract exam.

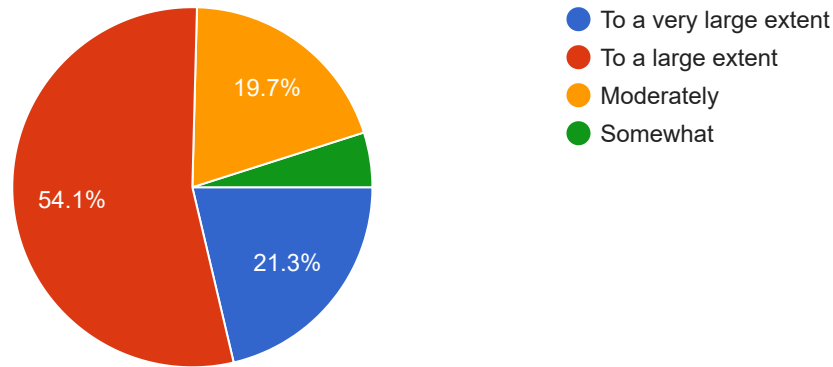

I understood the pattern of the department
Learned discipline nd basic manners in a better way

I grew the limited knowledge I had about things and learnt a little more about it. More importantly, I have a rough idea about how to deal with different things and how to approach towards things.

The mentoring by the Life Sciences Dept. helped me cope with my difficulties or challenges

The courses/syllabi were organized in a manner that helped me understand the fundamental concepts involved in Life Sciences.

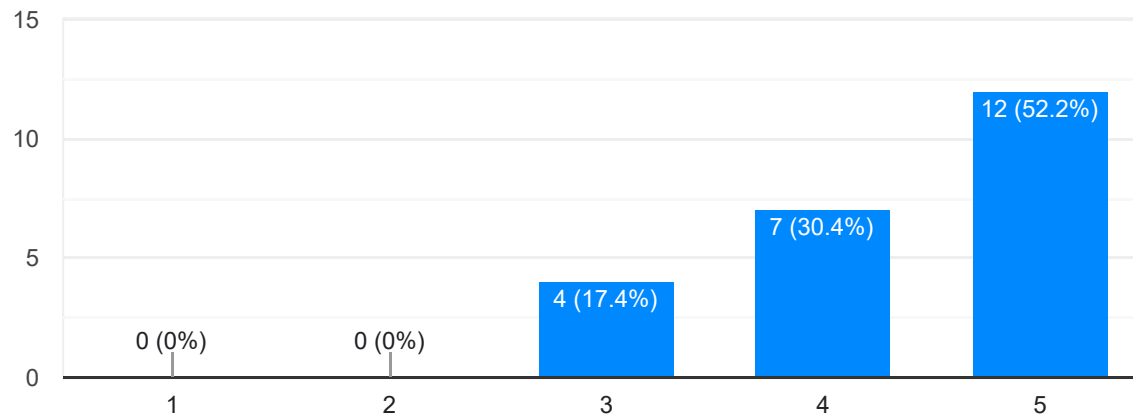

23 responses

The courses/syllabi provided me with the knowledge and confidence required to pursue post-graduate studies (MSc, etc) in fields related Life Sciences.

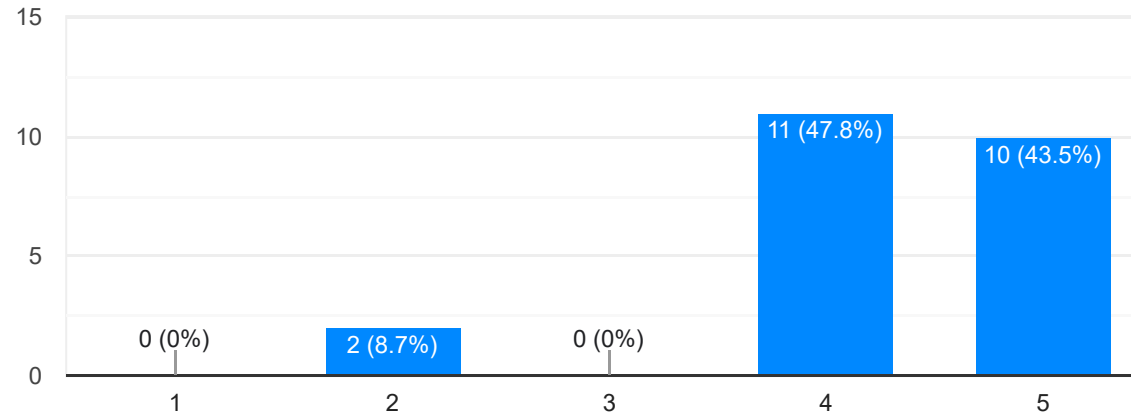

23 responses

The questions in the Semester End Exams measured not only our knowledge about also our ability to apply various concepts.

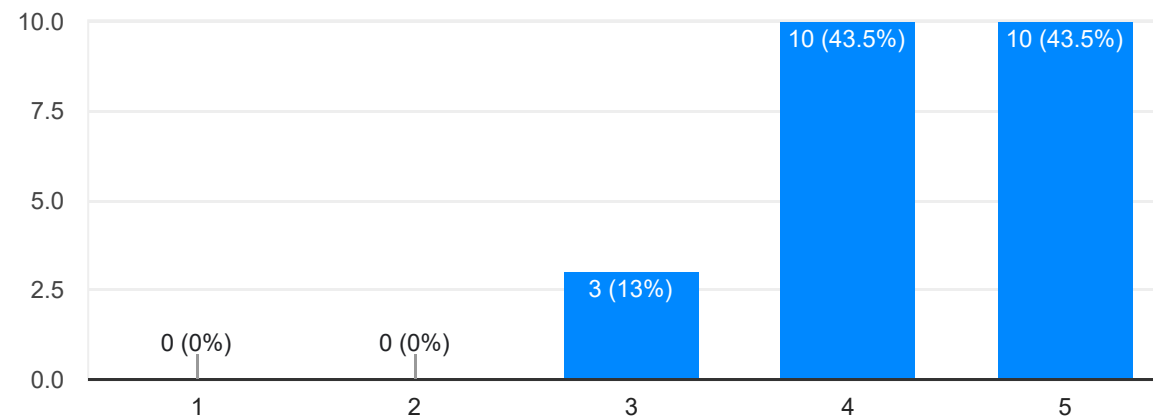

23 responses

The CA assignments/projects over the three years (FY to TY) were varied (different) and helped us learn and develop new skills.

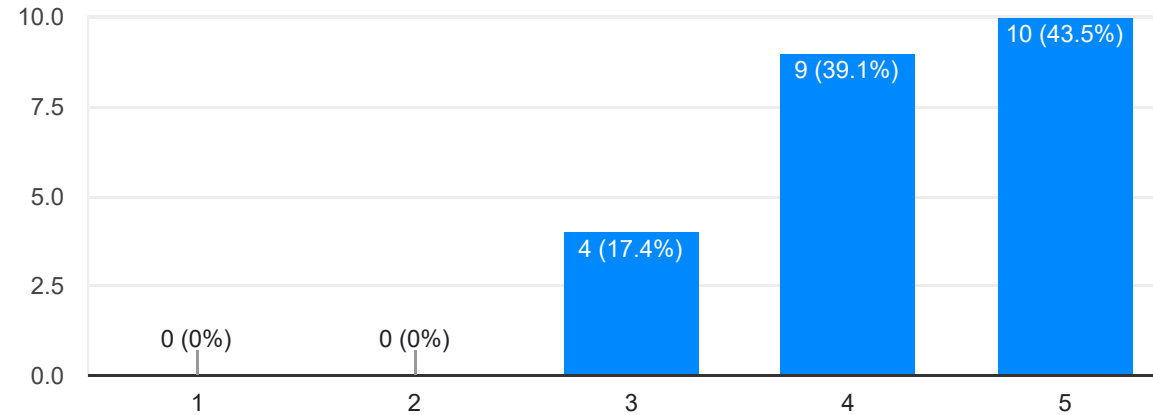

23 responses

The syllabi and CAs helped keep us updated with respect to current advances in Life Sciences and Research.

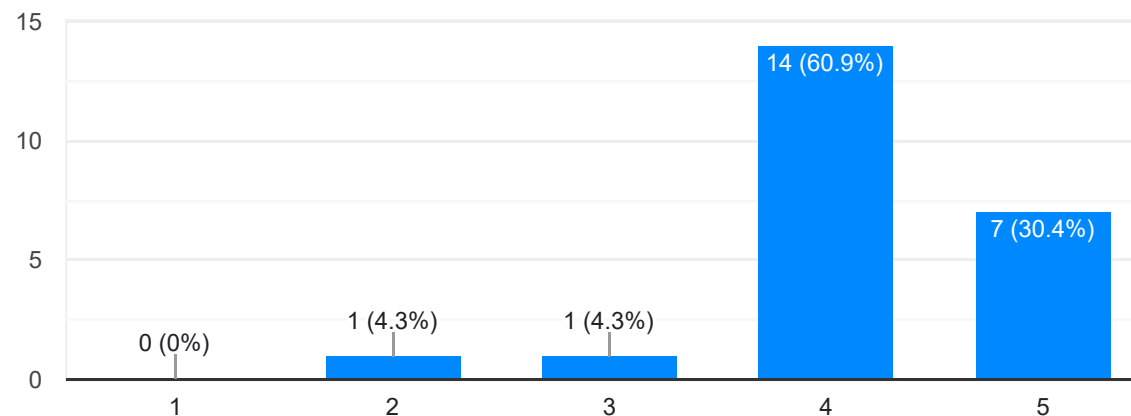

23 responses

The variety of topics in the Syllabi from FY to TY course helped in understanding various avenues and careers that can be pursued post BSc-Life Sciences and helped make an informed career choice.

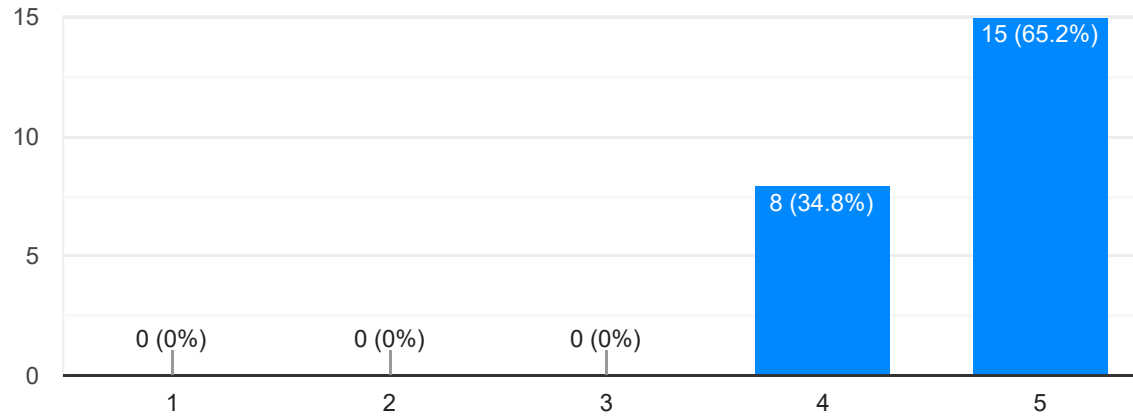

23 responses

How would you overall rate the BSc-Life Sciences Course

If Yes, which features of Autonomy do you think were the most useful for your child's academic growth? (You may select multiple options below)

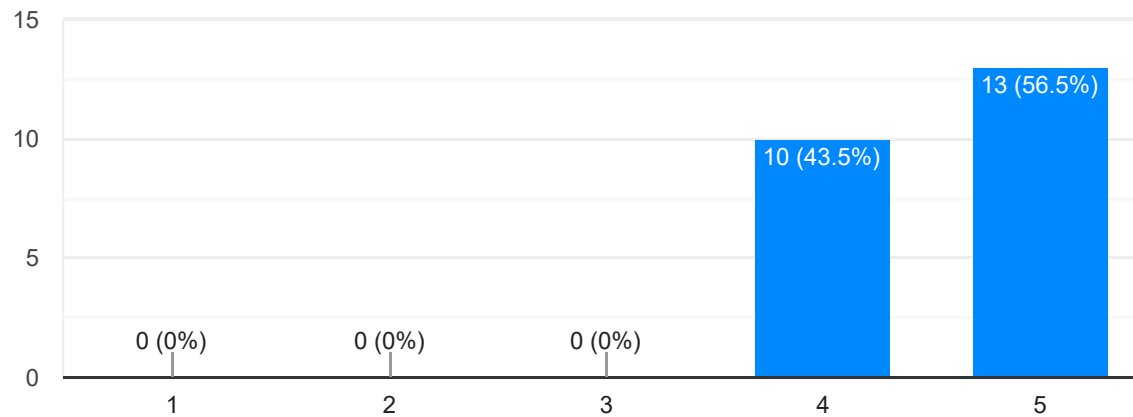

23 responses

How would you rate the Teachers of the Life Sciences Department?

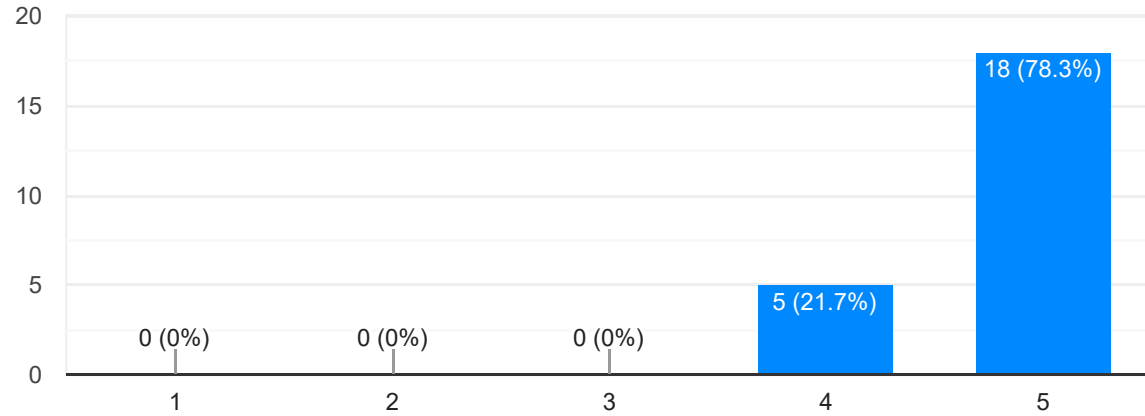

23 responses

How would you rate the Non-Teaching staff of the Life Sciences Department?

23 responses

What are the things that you like about the Dept. of Life Sciences?

23 responses

The way teachers guide and encourage students

The teachers and their efforts towards the students. All the teachers have their own kind of impact and how they work together towards the students.

Broad umbrella of syllabus which allows specialization in many subjects

Hands on experiences, challenging curriculum

Research and practical session

All their hardworking and loving nature towards the children's.

Teaching pattern

Teachers are strict which is necessary at one point for our child
Everything is done time to time
Each and every point is covered

Vision and Mission of the department like quality education with hands on experience.

Detail oriented, focused on overall development of child

Helping the student to give ones best performance

Discipline and to provide opportunities apart from the academia to develop your skill. The projects for continuous assessments involved video and animations in the past so the projects are practical and new for my ward to learn.

Teachers pushing the children to work and learn more. Due to which they explore new things themselves.

The research project carried out for students.

Encouraging students in research projects ,encouraging students to actively participating in explore,avishkar, strict attendance,covering each and every topics of syllabus.

Personal focus on each student

The discipline the variety of opportunities

The opportunities offered and the management skills of the department.

Overall management and staff.

Department of Life Sciences is an interdisciplinary department that provides their kids with an opportunity to explore and learn new things and allows them to think out of the box.

The ease of contact with the teachers, how the teachers help in general.

Very supportive department

Gives nice opportunities

Helps students get out of their comfort zone

Department is so organised

What changes would you like to see in Jai Hind College or the Dept. of Life Sciences in order to continue being a world-class institution? Suggestions are welcome.

23 responses

-

Dept sponsored internship

Kindly arrange a classroom for the final year students for the lectures to be conducted. It is a basic infrastructure facility that we Parents expect.

.

All good.

You are doing good, keep exploring innovative ways of teaching

No suggestions

Having a one on one session with students parents at regular intervals

Requesting to give some breathing room to children and leniency with attendance. If the kids aren't burnt out they will be more likely to attend happily.

Work pressure is a lot.

No suggestions.

-

Nothing

No changes as such

I am satisfied with the teaching and activities conducted by Life Sciences Department.

No changes

-

None at the moment.

Maintain their performance till the end
